Your Free Report -- "How To Become a Billionaire for World Peace"

by Alex Sprunt

Founder and CEO of [Your Healthy Planet.com](http://YourHealthyPlanet.com)
... where it PAYS to advertise being healthy and green!

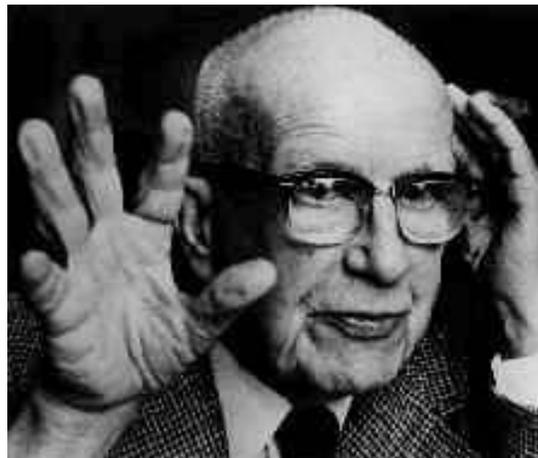

"The best way to predict the future is to invent it."

... R Buckminster Fuller

R Buckminster Fuller is considered by many as one of the most important humans of the twentieth century. A friend of many including industry giant Henry Ford and aviator Amelia Earhart he passed on in 1983 at the age of eighty eight. He was still inspiring young people around the world with his lectures the week before his death. His wife Anne passed away the very next day.

'Bucky' as he was fondly known, was awarded the Freedom Medal by US President Ronald Reagan, nominated for the Nobel Prize, published some 22 books and although 'expelled' from Harvard University twice, he received 42 honorary doctorates and even served a term as a Professor at Harvard.

*But his **greatest achievements** came not in the pursuit of fame or money, but from **solving problems** that he saw were preventing all of humanity being abundantly successful. In 1983 he said there were 4.7 billion potential billionaires on-board planet Earth, but they didn't know it yet.*

R Buckminster Fuller

“Either war is obsolete, or men are.”

... R Buckminster Fuller 3

"How To Become a Billionaire For World Peace"

Foreword

In 1981 and in 1983 'Bucky' Fuller published two of his twenty two books, and these were **Critical Path** and **GRUNCH of Giants (Gross Universal Cash Heist)**.

Fuller was born in 1895 and died in 1983 aged eighty eight.

'Bucky' as he was fondly known dedicated the last 55 years of his life **to improving the survivability of human beings and to do this he knew he would have to learn to do his own thinking.**

In fact he had to unlearn much of what he had been taught. As a part of this process he did not speak for two years.

In 1983 Buckminster Fuller gave a series of four all-day lectures entitled "Integrity Day".

You can still purchase the recording of the first one, and it is an amazing experience to listen to this amazing human being, who on that first day, 26th February 1983 is acknowledged by Mayor of LA, the Governor of California and then the President of the United States.

If you would like to hear what was said through this incredible day just click the following link to the Buckminster Fuller Institute where you can purchase an audio CD set of the first Integrity Day titled **[Only Integrity is Going to Count.](#)**

I believe R Buckminster Fuller is a person we will all hear and see much more about.

Here is a short extract from **Critical Path**. The language is a little bit different, but you do get used to it.

"Obviously Universe is not saying, "We cannot afford another galaxy – let alone another star – let alone another terrestrial crew of cosmically invisible human information-harvesting and -processing functionaries, whose problem-solving capabilities are being strangled by ignorant fears and selfishness aboard tiny planet Earth."

*Scientifically faithful, synergetically integrated, time-energy, electrochemical process accounting shows that **it costs energetic Universe more than a million dollars to produce each gallon of petroleum** when the amount of energy as heat and pressure used for the length of*

"The best way to predict the future is to invent it."

"How To Become a Billionaire For World Peace"

time necessary to produce that gallon of petroleum is charged at the New York Con Edison Company's retail kilowatt-hour rates for that much electricity.

About 90 percent of all U.S.A. employment is engaged in tasks producing no life support wealth. These non-life-support-producing employees are spending three, four and more gallons of gasoline daily to go to their non-wealth-producing jobs – ergo, **we are completely wasting \$3 trillion of cosmic wealth per day in the U.S.A.**

*In real, energy-time, know-how accounting of wealth the planet Earth's **four billion billionaires** have not been notified of their good fortune. **Their heritage probating is being postponed by the lawyers for the now inherently obsolete power structures of all kinds** – religious, political, financial, professional, and academic – all of which exploitative systems are organized only to take biased advantage of all scarcities, physical and metaphysical.*

***Evolution has now accelerated into revolution,** which, if it goes bloody will render humanity extinct, but if it goes via the design revolution, all humanity will win. **This is a new kind of revolution;** it is one that, instead of revengefully pulling down the top fortunate few, **will elevate all the heretofore unfortunates and the fortunates alike to new and sustainable heights** of realized life far superior to those previously tenuously attained by the most privileged few.”*

(Extracted from R Buckminster Fuller's “Critical Path”, p200)

The design revolution that Buckminster Fuller is speaking of is underway with new artifacts that enhance our survivability being invented and enhanced every day.

At the same time we have nuclear powers with opposing points of view, neither view being that of the majority of human beings. A fear still exists of potential nuclear war and extinction.

The actual 'context' today, for individuals, and for clubs, businesses and organizations is one of 'abundance' – and you, and every other individual, and organisation on our tiny planet earth can now accelerate your access to this abundance through a NEW Structure called **Your Healthy Planet.com**.

“The best way to predict the future is to invent it.”

... R Buckminster Fuller 5

"How To Become a Billionaire For World Peace"

I wanted to find a way to help fulfill what Bucky Fuller saw was possible over four decades ago, the possibility of our entire population living the lifestyle of billionaires ... **10 Billion Billionaires on-board spaceship planet Earth.**

This is the future that is destined for us ... so let's not screw it up.

"Our deepest fear is not that we are inadequate. Our deepest fear is that we are powerful beyond measure. It is our light, not our darkness that most frightens us. We ask ourselves, Who am I to be brilliant, gorgeous, talented, fabulous? Actually, who are you not to be? You are a child of God. Your playing small does not serve the world. There is nothing enlightened about shrinking so that other people won't feel insecure around you. We are all meant to shine, as children do. We were born to make manifest the glory of God that is within us. It's not just in some of us; it's in everyone. And as we let our own light shine, we unconsciously give other people permission to do the same. As we are liberated from our own fear, our presence automatically liberates others."

Marianne Williamson

"The best way to predict the future is to invent it."

... R Buckminster Fuller 6

"How To Become a Billionaire For World Peace"

1. Introduction

I am very happy you have an interest in creating a world that works for everyone, and creating a lot of money for yourself and others (*without disadvantage anyone*), or that you already understand the Generalized Principals of the Universe and are therefore keen to join in this game with us ... **the GAME of creating a World that works for everyone**.

Either way I thank you for downloading this Free Report on "**How To Become A Billionaire For World Peace**".

Feel free to share this report with everyone you know who may be interested in becoming a Billionaire for World Peace.

In 1994 I had the enormous pleasure and privilege of enjoying breakfast, lunch, some seminar sessions and a trip to the airport with a gentleman named Bill Galt, co-founder of the Good Earth Restaurant chain and a member of a World Council For Peace ... **it was my first meeting with a 'Billionaire for World Peace'.**

My name is Alex. I am the co-founder, founding advertising member, chief designer and administrator of a global, soon to be not for profit corporation and member's club that is quietly evolving.

It is called [Your Healthy Planet.com](http://YourHealthyPlanet.com).

"We are called to be architects of the future, not its victims."

R Buckminster Fuller

In 1994 I participated in a training program called "**Money & You**" promoted by author, trainer and entrepreneur Robert Kiyosaki and global educator [DC Cordova](#).

I soon discovered that [Money & You](#) had nothing to do with Money **and everything to do with me.**

I was introduced to the Money & You program by the closest person in my life at the time, my mother. She had seen Robert Kiyosaki interviewed on her favorite morning program.

"The best way to predict the future is to invent it."

... R Buckminster Fuller 7

"How To Become a Billionaire For World Peace"

They were discussing Robert's first book, which was titled "***If You Want to Be Rich and Happy, Don't Go To School***".

Robert says in the introduction of that book that even if you don't read it for yourself, read it for your children.

I read the book for my four children and myself and then attended a [Money & You](#) introduction to find out what the course was all about.

I was interested, **but I didn't like taking risks back then**, and although I felt I would benefit from doing the [Money & You](#) course **it was just as easy not to take any action.**

That reminded me of a quote from business philosopher Mr Jim Rohn who asks the question, *Why do some people take the actions, do the things that would lead to success and yet others don't?*

He would always say, "***Because it's just as easy not to.***"

Fortunately for me I was going through a transition in my life and I was looking for some answers, especially answers that made sense.

Working nine to five, commuting to the office and simply 'doing a good job' were no longer satisfying me as a human being, and I knew there was much more I could be doing **if I was free to take the journey.**

"Your future is created by what you do today, not tomorrow."

Robert Kiyosaki

How do you become FREE, I wondered?

My best friend's dad worked in a factory all his life and died not long after he retired. My father was a school principal until retiring at the age of 59. At the age of 84 he stays "busy" doing maintenance jobs and playing bowls. His father was a farmer who never really retired, he just slowed down ... and when he did retire into town he died.

Is it really possible for people like you or me to become free in our lifetime?

"The best way to predict the future is to invent it."

... R Buckminster Fuller 8

"How To Become a Billionaire For World Peace"

I mean being financially free, so that I can put my energy and my attention where I want to put it, put my energy where I see it would make a difference, rather than where I am told to put it by my job, or in order to pay the mortgage, or so I can 'earn a living'.

I have known for a long time that I wanted to design my future, a future that made an enormous positive difference to others.

As a first step I enrolled in the Money & You program, and my 'journey' soon began, a sort of "roller coaster" journey. The year was 1993.

Money & You quickly led to breakthroughs in my business career, and in my personal life. At the time I was the Chairman and a Director in a consulting engineering practice and **turnover increased by over 150% within the next twelve months.**

I left the engineering profession and co-founded a national conference broking service called Venue Finders that became a leader in the meetings industry in Australia, with offices in three states on the east coast.

We provided clients with a free service to find venues, saving them on average 40 hours of their time, and we provided a marketing service to venues at a commission.

"You can't make money and sense at the same time, they are mutually exclusive."

R Buckminster Fuller

Before participating in "Money and You" I had always worked for an hourly wage or salary, **but now I was learning something new,** I was now open to new information and soon saw my income was determined by the value I brought to the marketplace.

At Venue Finders I was earning a **commission** on each successful booking I made, and that was occasionally in excess of \$10,000 for one large booking even if I had only spent a matter of a few hours.

"The best way to predict the future is to invent it."

... R Buckminster Fuller 9

"How To Become a Billionaire For World Peace"

The **system** I developed was adding real value, and was able to save my clients and our company many hours work.

I quickly learned what LEVERAGE was all about, and how important it was to everyone's financial success.

Robert Kiyosaki had said in a public seminar; **"If you are not leveraged you will work harder and harder for less and less money"** ... and I had taken an active interest at looking for ways to develop leverage.

He had also talked about his first encounter or seminar with Buckminster Fuller, and **how he felt that 'Bucky' was speaking directly to him.**

Robert saw that his focus on making money **was actually costing the lives of people** who were working in "sweat-shops" producing the tee-shirts and caps, that were making him rich.

What did Buckminster Fuller actually mean when he said ... **"You can't make money and sense at the same time, they are mutually exclusive."**?

At the time I had no real idea.

My upbringing and education were in a middle class Australia. I was taught to get a good education, so I could get a good job, so I could make money, buy a house, buy a car and clothes and go on holidays and everything else. Everyone I knew was trying to do this.

I don't recall having stopped to think too much about it ...

"I look for what needs to be done. After all, that's how the universe designs itself."

R Buckminster Fuller

Looking back now it is very clear that most of the decisions about my future employment, my prosperity, wealth etc **were made with my personal welfare in mind.**

They were not consciously taking into account my community or country that I lived in, let alone our planet's survival.

[Click here to see a short video](#) of the Buckminster Fuller

"The best way to predict the future is to invent it."

... R Buckminster Fuller 10

"How To Become a Billionaire For World Peace"

Challenge which is now an annual event that invites projects, and designs that will help us get **closer to providing everyone on our planet with a high standard of living.**

[Your Healthy Planet.com](#) was an entry into the Buckminster Fuller Challenge in 2008 as a healthy green advertising cooperative and member's club.

The trim tab effect of Your Healthy Planet is to shift the FOCUS of advertising towards being healthier, greener and more sustainable (products and services).

We want to accelerate the growth of those aspects ... help promote and empower the individuals, clubs, businesses and non-profit organizations behind them.

The winner of the Buckminster Fuller Challenge in 2008 was Dr John Todd with a bold proposal to reclaim one and a half million acres of strip-mined lands in the Appalachian Mountains (devastated by open cut coal mining).

An incredibly ambitious and outrageous project but based on hard engineering facts that Dr Todd has collected over decades of work. ([Click here](#) for details of his actual proposal)

"If success or failure of the planet and of human beings depended on how I am and what I do...

How would I be? **What would I do?"**

R Buckminster Fuller

Stop for a few minutes and grab a piece of paper so you can write down a few things you know you could be doing today that will make a positive difference to the environment, and to the survivability of everyone living here, on planet Earth.

FACT: 20,000 men, women and children will die needlessly today, and another 20,000 tomorrow of preventable disease and hunger.

"The best way to predict the future is to invent it."

... R Buckminster Fuller 11

"How To Become a Billionaire For World Peace"

2. How The 'Context' Determines Your Future.

Firstly, what do we mean by 'context'?

Still got that piece of paper?

Write down the context of your life at present. Is it one of love, partnership, abundance? Or is it hard work, fear, scarcity, disappointment or something similar?

Now [click here](#) and listen to what Werner Erhard says about 'context'.

Werner Erhard was CEO and Founder of EST (Erhard Seminar Training), winner of the Mahatma Gandhi Peace Prize, and the person considered responsible for introducing **empowerment** as a legitimate business tool .

Werner Erhard was also a co-founder of [The Hunger Project](#) along with Buckminster Fuller and John Denver in 1977. The Hunger Project is ending chronic persistent hunger on our planet by 2020.

The context is what determines what is possible ... or what can actually be done, irrespective of your efforts or desires.

“Few people think more than two or three times a year; I have made an international reputation for myself by thinking once or twice a week.”

George Bernard Shaw

For example, let's say you have a yacht. Now the yacht has a large hole in it's hull and your bilge pump can not pump fast enough to manage the water coming in.

The context is “there's a large hole in my yacht” and that context is going to sink you (and your yacht) unless you repair the hole, **and thereby create a NEW context**.

Context was first explained to me during the [Money & You seminar](#) and I can still picture **a fruit bowl** being drawn on a flip chart, and then several pieces of fruit being drawn inside the bowl.

In the picture 'the fruit bowl' is the context, and while you can rearrange the fruit, put in extra fruit or different fruit, it is all held in

“The best way to predict the future is to invent it.”

... R Buckminster Fuller 12

"How To Become a Billionaire For World Peace"

place by the fruit bowl (ie by the context).

Take the fruit bowl away and the fruit will roll onto the bench, or even off the bench and onto the floor.

Without understanding what the context is the best you can do is rearrange the fruit in your life.

According to Buckminster Fuller the context of our economic system, locally and globally is still based on [Malthusian economics](#) of the 19th Century, a context of 'scarcity', there simply isn't enough to go round.

So there must be winners, and losers.

Do you know who the "losers" are?

That's right. At least 20,000 people 'lose' ... they lose their lives, through hunger and preventable disease. That is almost 600,000 people every month and close to three quarters of a million people a year who die needlessly.

Some years ago I saw a television NEWS report of a father and his four young children walking through the desert in Sudan.

He was searching for tree roots to feed his children. **His wife and one of their children had already died on the journey, and he was trying to save the remaining children.**

The fact that you are reading this report most likely puts you in **the top 1½ billion people on our planet who are actually living like kings.**

"Only two things are infinite, the Universe and human stupidity, and I'm not sure about the former."

Albert Einstein

In a recent interview with film-maker Jamie Snyder, (Buckminster Fuller's grandson) I was struck by the clarity with which he described what is happening around the planet, how he painted the current global picture. [Click here to watch a short part of that interview.](#)

"The best way to predict the future is to invent it."

... R Buckminster Fuller 13

"How To Become a Billionaire For World Peace"

He said that in 1980, 1½ billion people were living on less than a dollar a day and **"they were not making it"** ... and today that number is around 1 billion.

Then there is another 1½ billion who are "just making it", just surviving day to day with no security of food. Another 2½ billion are what the global community calls "middle income". Essentially they have a roof over their heads and some security of food, they may even have a small business that generates some income.

THAT LEAVES US ... 1½ billion people living like kings.

Do YOU believe that works, or has integrity?

"If humanity does not opt for integrity we are through completely. It is absolutely touch and go. Each one of us could make the difference."

R Buckminster Fuller

Your Healthy Planet.com and the 10 Billion Billionaires Club are focused on **raising everyone up to a level where we all live the lifestyle of billionaires, rather than participating in an outdated and erroneous conversation based on scarcity (in it's many forms).**

Recent statistics evidently reveal that fifty percent (50%) of the wealth on our planet is owned by only 2% of the population.

That doesn't sit well with me but I have a choice ... and so does do you. We can either consume all our energies "fighting" to correct something we believe is wrong (which hasn't made any difference yet), OR work together and use our combined energies to create the type of future we want for everyone, **and elevate everyone up, to a very high standard of living.**

Click here to watch a short video about the American health system ... and you will hear the context that keeps being expressed is there isn't enough money, **there is not enough resources, i.e. there is always scarcity.**

Then grab a copy of acclaimed economist, Paul Zane Pilzer's best selling book **"The Wellness Revolution"** and find out how the very same \$5,000 a year invested in a wellness or preventative health

"The best way to predict the future is to invent it."

... R Buckminster Fuller 14

"How To Become a Billionaire For World Peace"

fund (rather than into sickness insurance) will cover all your wellness and health services expenses **and it will also accrue a surplus of over \$1 million after twenty years.**

Michael Moore's movie "Sicko" provides a funny, and at times disturbing insight into the free health systems of Canada, United Kingdom and France compared to the bankrupt system in the U.S.

Does that mean everyone could be healthy, and a multi-millionaire today if it wasn't for the greed and selfishness?

How well informed are we, or are we continually being fed misinformation?

Understand that the people you see and hear advising you are often politicians or corporate leaders. Some are even Presidents or Prime Ministers of countries.

How well informed are they? Or are they driven by ulterior motives and 'deals' that they have done to gain power?

Buckminster Fuller believed many politicians are simply puppets or front men for the very wealthy and sadly very selfish few.

Robert Kiyosaki openly shares that there is one set of rules for the rich, and another set of rules for everyone else.

At an investment seminar in 1999 we saw documents from an Australian bank offering term deposits at 25% return, but they were not available to Australian citizens.

What in the world is going on? Evidently there has been a lot going on in the area of money and finances that most of us have not been aware of.

"When I am working on a problem, I never think about beauty but when I have finished, if the solution is not beautiful, I know it is wrong."

R Buckminster Fuller

Two very important and seemingly invisible events occurred during the 1970's that altered the context of our global economy forever.

"The best way to predict the future is to invent it."

... *R Buckminster Fuller* 15

"How To Become a Billionaire For World Peace"

You've probably heard all about the first event, in 1971 President Nixon took the United States dollar off the gold standard and **essentially floated the dollar against the 'trust'** the global economy has in the United States government's ability to support it's currency.

If you want to know more about the history of money and the ramifications of the decisions made, and decisions still being made please do your own research, there is plenty of public domain information available.

[Click here](#) to see some of the information available on the topic of "Money as Debt".

A second, and perhaps more important event occurred during the early 1970's when a large group of eminent scientists from around the world proved, **for the first time in history, that human beings have the capacity, the knowledge and resources to provide for everyone on earth at a relatively high standard of living.**

Buckminster Fuller said this was the case back in the 1950's however it took almost twenty years for scientists to prove it.

So what does that have to do with 'CONTEXT' we live in and it's affect on my lifestyle?

When I understood that the actual context on planet earth for the past forty years has been one of **ABUNDANCE and PLENTY FOR EVERYONE** (without disadvantage to anyone), and we could realize this possibility within as short a time as ten years I got very excited **... now here is one heck of a game worth playing.**

"Nature is trying very hard to make us succeed, but nature does not depend on us. We are not the only experiment."

R Buckminster Fuller

We now have the capacity to provide a high standard of living; a high standard of food, shelter and clothing for every human being on planet Earth. Providing there is a willingness, we can bring this future into reality within as short a time as ten years.

Nature conspires to make us successful. But are we listening? Who are you conspiring with?

"The best way to predict the future is to invent it."

... R Buckminster Fuller 16

"How To Become a Billionaire For World Peace"

[Click here now](#) and watch a short video that explains very simply how **we are all one ... it's natural law.**

“The best way to predict the future is to invent it.”

... R Buckminster Fuller 17

"How To Become a Billionaire For World Peace"

3. Are You Conspiring ... To Make It Happen?

Deepak Chopra says **"everything is a result of a conspiracy."**

It's not a good or a bad thing. It's what we do. Bucky Fuller called it SYNERGY and it is everywhere there is more than one ... and that means every body, every thing has a synergy yet few people understand its meaning and therefore its potential.

By definition it is two or more people acting together, and the SYNERGY is the outcome or result of the individual parts which is also 'unpredictable'.

In my first business venture, I conspired with four other engineers to create the best risk engineering practice in Australia, and I also had a vision for it to become the best R.E. practice in the world.

Most of our clients were in the petro-chemical industry, government, mining and other polluting industries. It was a very lucrative environment.

"You're either part of the problem, or you are part of the solution."

Anon

I knew that I was helping our clients 'profit' from activities that were often causing pollution or ill-health and one day I found that I was no longer able to continue down that path. I was conspiring to have them succeed and as I was no longer aligned with the majority of their intentions, eg. to sell sugar laden soft drinks and confectionery, petroleum or chemical based fertilizers etc I left.

I soon entered the wellness industry through coaching and nutrition opportunity which, as an athlete I was very aligned with. I was also unknowingly conspiring with a friend who was a naturopath and was interested in the power of the internet.

One day I got the idea of creating a structure that would easily allow individuals, businesses, clubs and not for profit groups to conspire with each other for their mutual benefit, and the overall benefit of people on our planet. This was the inception of our global member's club and Ethical Marketplace we now call Your Healthy Planet.com.

"The best way to predict the future is to invent it."

... R Buckminster Fuller 18

"How To Become a Billionaire For World Peace"

One of the goals of [Your Healthy Planet.com](http://YourHealthyPlanet.com) is to fund holistic education centers that we call Living Learning Centers.

A Not for Profit Foundation or entity is being established that will own [Your Healthy Planet.com](http://YourHealthyPlanet.com) and the Living Learning Center's we create.

Our five (5) year goal is to have initiated and / or partnered one hundred Living Learning Centers. **Many may be existing entities that are in need of funding or resources to fulfill their missions.**

The Foundation will receive it's funding from a number of sources, primarily it will come from the profits of [Your Healthy Planet.com](http://YourHealthyPlanet.com) plus any 'tithing' from it's members. Each LLC will work towards becoming economically sustainable serving it's community.

The structure of [Your Healthy Planet.com](http://YourHealthyPlanet.com) helps it's members "conspire" to create holistic education centers and a healthy, sustainable and abundant planet.

Members will also be conspiring to support each other's enterprises and dreams by buying and selling each others products or services through the **Ethical Marketplace**. These products and services will promote healthy, abundant and sustainable lifestyles.

*Buckminster Fuller's
Dymaxion Map*

Either we are conspiring to keep 'scarcity' here on planet earth, or conspiring to create a future of abundance.

It is very clear and proven by eminent scientists for over forty years that 'abundance' is the natural context of life on planet earth today, and is inclusive not exclusive.

It is no longer "you or me" ... it can only be "you and me".

"The best way to predict the future is to invent it."

... R Buckminster Fuller 19

"How To Become a Billionaire For World Peace"

4. Our Past - The Mistakes We Had To Have.

I was in a seminar once where the koan was *"there's nothing wrong; and there's nothing wrong when there is something wrong."*

Understanding this provided a lot more freedom in my life because I had been bought up believing 'this was right, that was wrong'.

The title of the seminar was "Producing Breakthrough Results – Part 1 Effectiveness, and Part 2 Velocity".

The seminar ran for twenty weeks and was definitely worth the investment of time and money. It was run by [Landmark Education](#), a global education company providing programs in over 50 countries.

Many people including me were bought up with the belief that it was wrong to make mistakes, and this is perhaps one of the most disempowering beliefs anyone could ever have. It stops creativity and actually slows down our evolutionary journey to abundance.

"A life spent making mistakes is not only more honorable, but more useful than a life spent doing nothing."

George Bernard Shaw

Our natural way of learning is one of making mistakes and correcting ... and in the process getting better at it, creating a better tool, component or process. **Just watch a child learning to crawl and then to walk.**

I had an experience ice skating with my children. My younger son was only four years old and so we held onto him, one either side so he didn't fall.

An older 'wiser' man (who was also an excellent skater) came up to us and said "If you just leave him on the edge he will learn much more quickly".

We took his advice, went over to the railing and quietly let Samuel move along the railing on his own.

A few minutes later he was skating out towards us in the middle of the rink ... it was amazing!

Thomas Edison is another example. He made one mistake after

"The best way to predict the future is to invent it."

... R Buckminster Fuller 20

"How To Become a Billionaire For World Peace"

another, and discovered 1000 ways not to make an light bulb. Then with the information he had learned created the electric light bulb.

He never ever quit!

Buckminster Fuller believed the past was all a necessary part of our journey as human beings, and the mistakes we made, plus the lessons we learn from them would determine **if the experiment 'human being' was going to be a success or not.**

With over 2 billion known galaxies in our Universe and each with an average 200 billion solar systems in each it could be that we are not the only experiment going on in the Universe.

'Bucky would often say "We were born with a right foot and a left foot, not a right foot and a wrong foot."

I can hear some people saying, "**Give me a break ... just open a newspaper or turn on the TV. You'll soon see and hear that there are lots and lots of things that are wrong, some of them really wrong, all over the world.**"

You may even be told what's wrong all the way over the other side of the planet ... thousands of miles away from where you are. It could be bird flu, terrorism, financial collapse, tsunamis and landslides ... job losses, airliner crash and much much more.

*"We are called to be architects of the future, not its victims."
R Buckminster Fuller*

Bucky was one of the first to distinguish that there exists a deliberate, organized effort to ensure the majority of people feel *concerned* or indeed *fearful*, and are therefore easily manipulated.

Many people are listening to, watching or reading this information everyday, and it's helping form their view of the world.

It is called the NEWS.

Today, many people, including my wife and I and some of our friends choose not to listen to the NEWS regularly, however when I do I have a different perspective on it, and I certainly don't believe everything I see, hear or read.

"The best way to predict the future is to invent it."

... R Buckminster Fuller 21

"How To Become a Billionaire For World Peace"

A significant part of [Your Healthy Planet.com](#) from it's inception over ten years ago has been to deliver more 'good news'. **We believe that good NEWS creates more good news ... and vice versa.**

In fact the internet is allowing news of all sorts be more easily accessed. Here is an independent news that you can subscribe to and log into everyday. **It's called the [Good News Network](#) ...**

Which would you rather?

But there are times when the mistakes of the past can be very hard to let go of, and if that's the case then help is available.

The two organizations below are for healthy and successful people who want to be empowered to deal with an area of their life that is important to them, or want very ethical coaching around their personal or business situation.

"You can never learn less, you can only learn more."

R Buckminster Fuller

I personally recommend both of these organizations from my own personal experience, however you should speak with them and make your own decision:

- the [Excellerated Programs including Money & You](#) and
- [Landmark Education's Curriculum For Living](#)

There are many other seminars and programs available and some have found their origins in the two above.

You will soon be able to search the [Ethical Marketplace on Your Healthy Planet.com](#) for programs and practitioners available in your area.

"The best way to predict the future is to invent it."

... R Buckminster Fuller 22

"How To Become a Billionaire For World Peace"

5. The Present Is A Gift ...

We are living in the most exciting and incredibly rewarding time in all of history, and yet it is a time of immense turmoil and distress for many people around the world.

Did you know that there are **more 'breakthroughs'** (creating amazing advantaging for human beings) happening today than ever before.

Only yesterday I read of **a hydrogen cell motor vehicle that just completed one million test miles ... without any pollution or emissions** other than water.

There is also an electric 'plug-in' vehicle capable of 300 mile range with a 45 minute recharge. **Want to WIN one?**

You can ENTER the draw to win one if you're quick ... it's a Tesla S Electric plug-in sedan valued at \$55,000. **[Click here to enter](#)**

"Faith is more powerful than belief. When you believe you are relying on someone else's thinking."

Buckminster Fuller

Have you heard of some of the other breakthroughs and new technology that are happening today?

Here's a couple:

- the solar technology being developed in America where raw sand is being used and the PV cells formed by spraying onto existing roofing thereby creating clean, renewable mini-power stations everywhere.
- Shi Zhengrong, Australian educated scientist who founded Suntech Power, China's largest photovoltaic manufacturer in 2001. Shi has capitalised on a surge of environmentally driven demand in Germany, the US and elsewhere that has turned his company into a global powerhouse and made him, by some estimates, the richest man on the mainland.
- Chinese billionaire nicknamed 'Light', Xiaofeng Peng, 33, who

"The best way to predict the future is to invent it."

... R Buckminster Fuller 23

"How To Become a Billionaire For World Peace"

got into solar energy in 2005 and took his company, LDK Solar, which makes silicon wafers used in solar panels, went public on NYSE two years later.

- The richest and most celebrated of this overachieving lot are Google co-founders Sergey Brin and Larry Page. The pair, who are both sons of professors, met at Stanford University while pursuing Ph.D.'s in computer science and dropped out together when they were just 25 to start Google. They debuted as billionaires at ages 30 and 31. Today they are worth \$18.7 billion and \$18.6 billion apiece.

Now today, two young guys get an idea; they wanted to be able to socialize and talk with their friends over the internet and a few years later they are billionaires.

If they can do it then you can do it too. **Are you willing to step into abundance?**

What are you passionate about? Are you willing to opt for integrity?

"What usually happens in the educational process is that the faculties are dulled, overloaded, stuffed and paralyzed so that by the time most people are mature they have lost their innate capabilities."

Buckminster Fuller

Perhaps business or the environment or the internet are not your thing ... then what about sports?

- Golfing star Tiger Woods has accrued close to (evidently he doesn't keep track of his earnings) one billion dollars in prize money.

I know success isn't all about money but money provides you with the opportunity to do things you may not otherwise be able to.

Two sporting stars that I admire a lot, tennis star Andre Agassi and soccer legend David Beckham are both helping young people get involved in their particular sports and I believe that Andre has also built schools.

Today, in our largely capitalist society it takes a lot of money to

"The best way to predict the future is to invent it."

... R Buckminster Fuller 24

"How To Become a Billionaire For World Peace"

create these sorts of programs.

[10 Billion Billionaire's Club](#) and [Your Healthy Planet.com](#) are focusing attention on the healthy, green and sustainable aspects of products and services that we have and helping to 'free up' the flow of money and resources.

Every individual, sporting or social club, business or organization who comes on-board [Your Healthy Planet.com](#) and helps create a world that works for everyone:

- Goes in the Draw for a chance to **WIN a New Tesla S** Electric plug-in sedan value \$55,000**
- Gets **FREE Membership** to the Living Institute
- **Can market** the healthy, green and sustainable aspects of your products and services to a growing target audience
- **Can EARN an EXTRA income** of \$3,000 a month, five or ten thousand or even up to \$50,000 a month or more through our Rewards Payment Program.
- **Help us develop holistic education centers** or Living Learning Centers. 100% of profits from Your Healthy Planet.com go into the Sustainable Children's Fund.
- **Help others become successful** as they pursue their passions and grow as individuals.

You can **JOIN Your Healthy Planet.com TODAY** by:

- **Becoming a FREE Member [CLICK HERE](#)**
- Then, if you have a product or service that improves 'survivability' on this planet, log in and click on the "advertise" button.
- Select a Standard, Premium or limited GOLD Founding Advertising Membership and you will go in the draw for the Tesla S sedan**.

(**Drawn when total advertising membership reaches 10,000.)

"The best way to predict the future is to invent it."

"How To Become a Billionaire For World Peace"

6. How 'Bucky' Saw The Future.

Buckminster Fuller wore thick, 'coke-bottle' lens glasses because of his poor eyesight; but he also suffered from a condition of '**far sightedness**'.

He could see well into the distance, and well into the future.

Forty-eight of fifty predictions he made came true. The two that didn't are that political parties would be irrelevant by the year 2000AD, and that hunger and poverty would be 'history' by 2000AD.

What Buckminster Fuller saw in the future was based on hard engineering facts and trends he and others had researched and monitored for years and decades.

"I'm not a genius. I'm just a tremendous bundle of experience."

Buckminster Fuller

We have two major obstacles to all humanity's realization of it's option to "make-it".

1. **First is the fact that humanity doesn't understand the language of science.**

Because of this we don't know that the physical Universe consists entirely of the most exquisitely inter- reciprocating technology.

Fuller says that 99% of humanity (C1980) thinks "technology" is a new phenomenon ... and that it is predominantly "weapons and machines" that compete for their jobs.

As a result most people are actually against technology, **not knowing that it is their only means of "making it"** on this planet".

2. The other prime obstacle to realization of "the great option" is the fact that the world's power structures have always **"divided to conquer"** and have always **"kept divided ... to keep conquered"**.

So what is it about "technology" that had Fuller believe it is essential to our 'survival' or our option to "make it" on planet Earth?

"The best way to predict the future is to invent it."

... R Buckminster Fuller 26

"How To Become a Billionaire For World Peace"

This report, for instance is an example of technology; **of being able to "do so much more with so much less" ...**

As soon as it is complete we upload it into the invisible ether of the internet, type a short email, press send and deliver it to hundreds and possibly thousands of people's homes and work places.

The cost of sending this Free Report is almost zero ... compared to the hundreds of dollars and many man hours to print, bind and post the report.

A simple example of technology that 'Bucky' spoke of with passion and followed with great precision is the recycling of metals, such as copper, which has a close relationship to gold, silver and aluminum.

Every seventeen years there is a glut of recycled metals available, as **new technology "frees" the metal to be re-used again.**

"We know what we are, but we know not what we may become."

William Shakespeare

Technology is freeing up energy and resource at an accelerating rate ...

Just as nature's technology aborts her young and makes some edible plants inedible during drought and produces "bumper crops" when conditions are ideal, we have the ability to employ technology to not only ensure our survival but, if willing to have everyone flourish then **10 billion billionaires is done, just as Bucky predicted.**

The examples of technological breakthroughs are numerous.

One example is the Tesla sedan that a Founding Members of Your Healthy Planet.com could WIN?

Click here and watch this video and you will hear that a recharge / refuel of the Tesla S that will allow it to travel up to 300 miles is just five dollars, compared to say twenty five dollars for a petrol fueled automobile. **Click here for a chance to WIN**

Yes, technology is creating the abundant future Bucky knew was possible, but there is still a chance we may use it to destroy

"The best way to predict the future is to invent it."

... R Buckminster Fuller 27

"How To Become a Billionaire For World Peace"

ourselves instead.

There is an urgency and MASSIVE ACTION is needed.

The next steps for us to take will happen as quickly as you and I make them happen.

One of Bucky's greatest students is Marshall Thurber who was the founder of [Money & You and the Business School for Entrepreneurs](#).

He says that one hundredth of one percent of the decisions you make each year determine your life, and your lifestyle.

Each of us, he says, makes around 1,000 decisions every day or some 365,000 decisions a year.

Thirty seven of these decisions have the greatest impact on your life, and similarly this small percentage of our combined decisions must surely determine our societies future.

"If humanity does not opt for integrity we are through completely. It is absolutely touch and go. Each one of us could make the difference."

R Buckminster Fuller

Bucky knew that technology (our ability to do more with less) was capable of freeing humans from the drudgery of earning a living, and that a comprehensive design revolution was necessary to elevate our human existence from where it is today, to one where everyone on earth is able to enjoy life fully, and at a standard of living that no one on earth has yet experienced.

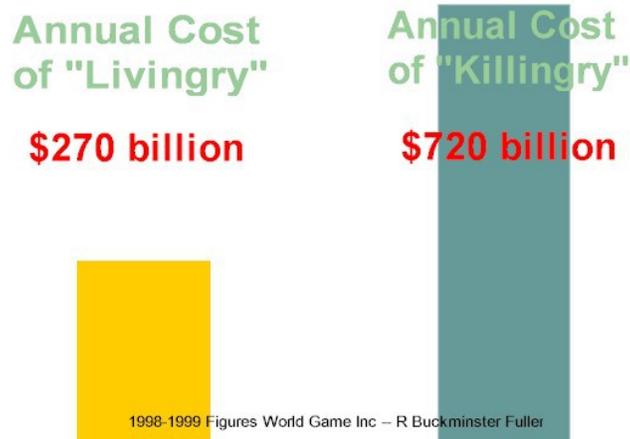

This future is possible providing we prevent ourselves from blowing ourselves up, **something that is still of major concern** to many around the world.

In 1999 my wife Helen and I met playing Buckminster Fuller's World Game in Melbourne, Australia. At the end of the game we sat down and completed the day ... and we learned that a small, or relatively small **\$270 billion a year was all the extra money required to provide food, clothing and shelter for everyone on planet earth;** and yet in that same year we spent some \$720 billion on weapons and warfare.

"The best way to predict the future is to invent it."

... R Buckminster Fuller 28

"How To Become a Billionaire For World Peace"

By 2009 the US alone had spent over \$2.3 trillion on military spending, and is reputedly spending around \$1 trillion a year.

The population has increased over the past decade and so has our technological capacity to provide for everyone on-board planet Earth.

"Humanity has the option to become successful on our planet if we reorient world production away from weaponry -

from killingry to livingry.

Can we convince humanity in time?"

R Buckminster Fuller

In Bucky's lifetime, overall literacy levels went from 5% of humanity being able to read and write to around 65%.

Now that individuals have access to information they could also

"The best way to predict the future is to invent it."

... R Buckminster Fuller 29

"How To Become a Billionaire For World Peace"

become 'responsible' and start to do their own thinking.

Bucky believed the need for political parties was becoming irrelevant.

The current transition that humanity is currently going through he said was one of the most difficult transformations in all of history **because it requires a conscious choice to move beyond** the old paradigm of "scarcity".

It requires us to move beyond scarcity, beyond the need for country borders, of instilling fear in people; to a paradigm of abundance, compassion, empowerment, sharing, recycling and allowing the free flow of food, money, metals and chemicals to benefit all mankind.

Bucky also saw **networking as natural**, and it was happening at an ever increasing speed. He believed networking is unstoppable.

"The fearful sovereign nation politicians will find that trying to arrest networking is like trying to arrest the waves of the ocean."

R Buckminster Fuller

Bucky said **"As the networking accelerates humanity into a spherically embracing, spontaneous union,** yesterday's locally autonomous, self-preoccupied governments are left in the exclusive control of yesterday's most selfishly successful and entrenched minorities." (*GRUNCH of Giants, pxxii*)

The future that Buckminster Fuller saw possible for all humanity is an **incredibly exciting and amazing future;** achieved through elevating everyone to a standard of living that no one yet has experienced.

A comprehensive design revolution is now happening where more and more individuals have the freedom, the resources and the knowledge to see challenges, and to go to work to make this world a better place ... **and, it won't seem like work any more.**

"The best way to predict the future is to invent it."

... R Buckminster Fuller 30

"How To Become a Billionaire For World Peace"

7. Next Steps ...

You may already be involved in one way or another in making a 'positive difference' to the lives of people in your community, in your region, nationally or even globally.

You may also be **involved in a 'network'** or organization that is making an even greater difference on our planet.

If not, get involved in networking **... and make sure you choose one that 'makes sense', and is not simply focused on making money.**

As a risk engineer I learned that engineered solutions generally provide the most cost effective solutions to any given problem.

Bucky Fuller was decades ahead of general understandings and assumptions of his time, and this was no different with his call for a comprehensive design revolution that would elevate all of humanity to a living standard above that which anyone had yet experienced. **But it is now about to happen ... and may happen in as short a period as in the next ten years.**

"Coming together is a beginning; keeping together is progress; working together is success."

Henry Ford

I have personally been involved with a network marketing company within the nutrition industry. It all started as a result of my passion for health and well-being and I personally love helping people improve their health and enjoy their lives more.

Imagine the FREEDOM to do what you love doing ... as an artist, as a coach, a dentist or doctor, a scientist or travel agent, a motor mechanic or accountant, a sales person or a lawyer; **advertising the healthy, green or sustainable aspects of what you do or sell to a target audience can increase the likely-hood of new business, and being paid and rewarded for your efforts.**

"The best way to predict the future is to invent it."

... R Buckminster Fuller 31

"How To Become a Billionaire For World Peace"

On 30th September 2009 we accepted a tender to complete a brand new structure, including a member's club and Ethical Marketplace. It is a major undertaking and was finally completed in early 2011.

Every new enterprise requires momentum and needs to achieve a level of stability for it to succeed.

I INVITE you to 'come on-board' and play this Buckminster Fuller inspired game with us ... a game to create a world that works for everyone, without disadvantage to another or to our environment.

It's called **[Your Healthy Planet.com](http://YourHealthyPlanet.com)**.

Start TODAY, become one of the 3650 Founding Advertising Members to help launch [Your Healthy Planet.com](http://YourHealthyPlanet.com).

"Take up one idea. Make that one idea your life – think of it, dream of it, live on that idea. Let the brain, muscles, every part of your body, be full of that idea, and just leave other ideas alone. This is the way to success, that is way great spiritual giants are produced."

Swami Vivekananda

Click on one of the boxes above and "**[come on-board](http://YourHealthyPlanet.com)**" Your Healthy Planet.com today. Everyone starts as a **[FREE Member](http://YourHealthyPlanet.com)**.

Will you become one of our **3650 Founding Advertising Members** who **SAVE 67%** on their advertising subscriptions and only ever pay either \$17, \$27 or \$57 a month for their two advertisements?

"The best way to predict the future is to invent it."

... R Buckminster Fuller 32

"How To Become a Billionaire For World Peace"

When you advertise on Your Healthy Planet.com:

- **you get a 30 day trial for only \$4.70, used to plant a tree on your behalf.**
- you receive **two advertisements, one absolutely FREE!**
- You receive **entries into the draw** for a chance to WIN an exciting New Tesla S sedan valued at \$55,000
- you help to **provide the momentum** and resources necessary to ensure Your Healthy Planet.com's success, and
- you will **learn how to EARN an EXTRA healthy income. Earn an extra \$500 / month, \$5,000 or even up to \$50,000 / month in rewards payments#.**

“Never doubt that a small group of thoughtful, committed citizens can change the world; indeed, it's the only thing that ever has.”

Margaret Mead

As Buckminster Fuller and others have made clear; **there is no scarcity, and we do have an option to make it ...** and by working together and focusing on the healthy, green, sustainable future we want we can achieve it in our lifetime.

Life is a series of habits. If your habits are based on scarcity then let's start creating new habit's that are more aligned with the world we live in today.

Take on the practice of **“stepping into abundance”** today and each and every day.

Click on one of the boxes above and start as a **FREE Member** of Your Healthy Planet.com.

“The best way to predict the future is to invent it.”

... R Buckminster Fuller 33

"How To Become a Billionaire For World Peace"

Then become a Founding Advertising Member ... and let's play 'this game' like we've never played before!

I thank you for downloading this report, or accepting it from a friend or family member, for being great and for your commitment to making the world work for everyone.

It may seem unrealistic to believe that it is possible ... to have 10 billion billionaires living on this small planet Earth, but it is already done and waiting for you and me.

“This is the true joy in life, the being used for a purpose recognized by yourself as a mighty one; the being thoroughly worn out before you are thrown on the scrap heap; the being a force of Nature instead of a feverish selfish little clod of ailments and grievances complaining that the world will not devote itself to making you happy.”

George Bernard Shaw

Just now another of the world's wealthiest men George Soros is putting \$1 billion into developing technology to create clean energy.

This is what Buckminster Fuller said would happen to help accelerate our journey towards realizing success for all humanity.

8. Quotes

"The best way to predict the future is to invent it."

R Buckminster Fuller

"Either war is obsolete, or men are."

R Buckminster Fuller

"Our deepest fear is not that we are inadequate. Our deepest fear is that we are powerful beyond measure. It is our light, not our darkness that most frightens us. We ask ourselves, Who am I to be brilliant, gorgeous, talented, fabulous? Actually, who are you not to be? You are a child of God. Your playing small does not serve the world. There is nothing enlightened about shrinking so that other people won't feel insecure around you. We are all meant to shine, as children do. We were born to make manifest the glory of God that is within us. It's not just in some of us; **it's in everyone.** And as we let our own light shine, we unconsciously give other people permission to do the same. As we are liberated from our own fear, our presence automatically liberates others."

Marianne Williamson

"We are called to be architects of the future, not its victims."

R Buckminster Fuller

"Your future is created by what you do today, not tomorrow."

Robert Kiyosaki

"You can't make money and sense at the same time, they are mutually exclusive."

R Buckminster Fuller

"I look for what needs to be done. After all, that's how the universe designs itself."

"The best way to predict the future is to invent it."

... R Buckminster Fuller 35

"How To Become a Billionaire For World Peace"

R Buckminster Fuller

"Few people think more than two or three times a year; I have made an international reputation for myself by thinking once or twice a week."

George Bernard Shaw

"Only two things are infinite, the Universe and human stupidity, and I'm not sure about the former."

Albert Einstein

"Thinking is the hardest work there is, which is probably the reason so few engage in it."

Henry Ford

"You're either part of the problem, or you are part of the solution."

Anon

"A life spent making mistakes is not only more honorable, but more useful than a life spent doing nothing."

George Bernard Shaw

"You can never learn less, you can only learn more"

Buckminster Fuller

"Faith is more powerful than belief. When you believe you are relying on someone else's thinking."
